- Tuesday 13:00-16:00
- Wednesday 11:00-13:00

Description

Kovan M.I. is a leading company for the production of boilers and stoves for the heating of private, residential and industrial buildings, using renewable energy sources (pellet biomass and solar energy). EKOLINE KOVAN become well know brand in pellet industry which we use to enter to much complex projects as offering planning and production of complete lines for pelleting - Turn key solution. Many client immediately recognized our quality and innovative approach in this business and until 2010 we have many successful projects. With high quality of equipment we became partners of well know European companies in pellet and electronic sector, such as Andritz Feed and Biofuel Germany, BRUKS woodchippers Germany, SIEMENS, etc. Since we are equiped with latest machines in sheet metal industry we are offering services in sheet metal processing. Our quality services gave us opportunity to work with many companies from EU, and at the moment we export to 14 European countries.
